Education

K L University

B.Tech in Computer Science and Engineering — 9.09 CGPA

Aug. 2024 – May 2028

Vaddeswaram, AP

Projects

BookMyCare – Patient Appointment Booking System | Spring Boot, PostgreSQL, ReactJS, REST APIs 2026 – Present

- Built a scalable full-stack patient appointment system with patient registration, doctor/admin modules, appointment scheduling, and secure role-based workflows.
- Designed production-oriented backend architecture using Spring Boot and PostgreSQL with authentication, authorization, and optimized database relationships.
- Implemented appointment booking logic, admin workflows, and structured REST APIs focused on real-world hospital management and conflict-free scheduling.

CertifyMe – Certification Tracking Platform | Spring Boot, ReactJS, PostgreSQL, REST APIs

Live Deployment | GitHub

Feb 2026 – Present

- Built and deployed a production-ready full-stack platform supporting certification workflows and approval pipelines for 4000+ students.
- Implemented role-based access control for students, faculty, and administrators with secure validation, approval tracking, and real-time certification status updates.
- Optimized PostgreSQL queries, reporting pipelines, and dashboard performance through indexing, query tuning, and efficient database workflows.

ManageYour Project – Project Management Portal | Node.js, ReactJS, PostgreSQL, REST APIs

Live Deployment | GitHub

Nov 2025 – Present

- Built a scalable project submission and evaluation platform for students and faculty with end-to-end workflow automation and structured approval pipelines.
- Developed backend APIs for project submission, mentor reviews, faculty approvals, evaluation tracking, and academic workflow management.
- Designed normalized PostgreSQL database structures and optimized backend request handling for faster project tracking and reporting.

Skills Summary

Backend & Core Stack: Java (Spring Boot, Hibernate), Node.js, PostgreSQL, REST APIs, JWT Authentication, RBAC
Database & Performance: Query Optimization, Index Design, N+1 Problem Solving, Normalization, Transaction Management

Frontend & Tools: ReactJS, HTML, CSS, Tailwind CSS, Git/GitHub, Docker Basics, AWS (EC2, S3 Basics), OCI

Engineering Practices: Problem Solving, Debugging, API Design, Live Deployment, End-to-End Development

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, System Design, API Design

Certifications

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional

Oct. 2025

Oracle

Oracle Cloud Infrastructure 2025 Certified Data Science Professional

Sep. 2025

Oracle

Competitive Programming

Solved 400+ DSA problems across LeetCode, HackerRank, and CodeChef with strong focus on algorithms, optimization, debugging, and backend problem solving.

Hackathons & Innovation

- Code4Change Hackathon 2025 – Built a Patient Appointment Scheduling System focused on improving hospital appointment workflows and reducing patient waiting time.
- Ideathon 2026 – Developed a traffic management solution addressing congestion and road safety challenges; presented the solution before mentors at ACIC-KL Startups Foundation.
