Education

K L University

Bachelor of Technology in Computer Science and Engineering CGPA: 9.22 / 10.00

Aug 2024 – May 2028

Vaddeswaram, Andhra Pradesh

Software Engineering Projects

CertifyMe – Certification Tracking Platform

Feb 2026 – Present

Spring Boot, Hibernate, ReactJS, MySQL, REST APIs, JWT

[Live Demo](#) | [GitHub](#)

- Automated certification approval workflows for 4,000+ students by engineering a production-ready role-based platform using Spring Boot, ReactJS, and PostgreSQL.
- Engineered scalable backend services that streamlined secure validation pipelines, workflow automation, and role-based access control for students, faculty, and administrators.
- Optimized PostgreSQL indexing, normalized schema design, and query execution to improve dashboard responsiveness and enable scalable reporting.

BookMyCare – Patient Appointment Booking System

Apr 2026 – Present

Spring Boot, ReactJS, PostgreSQL, REST APIs

[Live Demo](#) | [GitHub](#)

- Engineered a healthcare appointment management platform that streamlined patient registration, doctor scheduling, and secure role-based workflows using Spring Boot and PostgreSQL.
- Reduced appointment scheduling conflicts by implementing transactional booking workflows, validation-driven business logic, and JWT-based authentication for secure access control.
- Designed modular REST APIs and normalized database relationships to improve backend maintainability, scalability, and long-term extensibility.

ManageYourProject – Project Management Portal

Nov 2025 – Present

Node.js, ReactJS, PostgreSQL

[Live Demo](#) | [GitHub](#)

- Automated project submission, mentor review, and approval workflows by developing scalable backend APIs using Node.js and PostgreSQL.
- Improved application performance by optimizing relational database design, backend request handling, and reporting workflows for reliable project lifecycle management.
- Delivered maintainable software through modular REST API design, structured debugging, Git-based version control, and iterative development aligned with SDLC best practices.

Technical Skills

Programming Languages: Java, Python, C, JavaScript, SQL

Backend Development: Spring Boot, Hibernate, REST APIs, JWT, Node.js, Microservices

Frontend Development: ReactJS, HTML, CSS, Tailwind CSS, Responsive UI Development

Databases: PostgreSQL, MySQL, Schema Design, Normalization, Indexing, Transaction Management

Developer Tools: Git, GitHub, Docker, VS Code, IntelliJ, Postman

Cloud: AWS, OCI, CI/CD Fundamentals, Agile Methodology, Scrum

Computer Science: Data Structures & Algorithms, Object-Oriented Programming(OOP), Database Management Systems(DBMS), Operating Systems, Computer Networks, System Design Fundamentals

AI/ML: Data Analysis, NumPy, Pandas, Scikit-learn, Generative AI, LLMs, Natural Language Processing

Competitive Programming

Solved 400+ DSA problems across [LeetCode](#), [HackerRank](#), and [CodeChef](#), strengthening foundations in Data Structures & Algorithms, problem solving, debugging, and software engineering fundamentals.

Certifications

OCI 2025 Certified Generative AI & Data Science Professional

Oct 2025

Oracle

[Show Credential](#)

AWS Certified Cloud Practitioner

Jul 2026

Amazon Web Services (AWS)

[Show Credential](#)
